The R. V. Photogravure Company draw attention to their process of printing in colors. It is a perfected modification of the three-color printing process called CHROMO-GELATINE. It is so named from the Gelatine process of printing, being used to produce the resulting pictures, which are allowed to be really wonderful. The advantages of the gelatine process for the purpose are obvious, as true photographic gradation is obtained in contradistinction to the Half-Tone process, where solid lots or lines only are produced. The work is done both on hand and power presses, and is especially suitable for the reproduction of works of Art, Scientific and Natural History objects, where color is of importance. Travelers' Samples of Colored Goods, such as Rugs, Carpets, Furniture, etc., etc. In every case the absolute accuracy of the photograph is maintained.

Proofs can be supplied within four days after the order is given, while the price is much lower than by any other known method of printing in colors. Samples sent on receipt of twenty-five cents.

The R. V. Photogravure Company also draw attention to their photogravures printed in tints. By this method very charming effects are produced at a moderate increase in cost.

The R. V. Photogravure Company has the most complete staff and plant for the reproduction of all classes of photomechanical work. Samples and estimates will at all times be cheerfully submitted. Publishers of the High Class, Unique, Artistic Monthly, "Sun and Shade."

Negatives and Photographs made, both in our Studio and outside, of all sizes up to 24 x 30. The company has on hand thousands of subjects of all classes, available for the purposes of illustration, and at the service of its customers. The newest and best subjects are being continually added to this collection. Sets of illustrations selected with the greatest care and skill for any desired purpose.
